The general observations and recommendations were provided by the external members. The salient points of the discussions are given below.

- The curriculum for new courses should incorporate inputs from industry to ensure relevance and alignment with real-world applications. Collaboration between industries and academic institutions should be strengthened through MoUs, focusing on technology transfer and mutual growth.
- Efforts should be directed toward securing the grant and commercialization of published patents to maximize their impact. Faculty members are encouraged to submit research proposals in strategic areas such as defence and space, leveraging funding opportunities under schemes like IDEX and RESPOND.
- To broaden expertise, expert lectures on specialized topics, such as Space Law, should be organized. Faculty should also prioritize publishing their research in high-quality journals to enhance the institution's research standards. Additionally, they should expand their technical skills by undergoing training in cloud platforms like Oracle and Microsoft Azure, alongside AWS.
