The general observations and recommendations were provided by the external members following the presentations by the Schools. The salient points of the discussions are given below,

1. New courses that are being designed should have all components of knowledge comprehension, application, analysis and synthesis. The evaluation should have clear demarcation between cognitive and physical psycho-motor skills
2. Humanities and Social Sciences should contribute towards policy making process for which programmes and Curricula have to be designed
3. University should encourage inter- and cross-disciplinary study. Upskill and upgrade is essential for industry workforce and Universities have an opportunity to fill this space
4. Students should have a forum to present their research ideas and work. Under- and Post-graduate students should be encouraged to join the research scholars in presenting their work
5. Centers of Excellence to be established in collaboration with other premier institutions or industry to form cohesive work groups

The meeting ended at 01:00 pm after vote of thanks by the Registrar.
